

ADD SPEECH RECOGNITION EDITING SKILLS TO YOUR RESUME!

The medical transcription industry is evolving with the increased use of speech recognition technology. Stay ahead of these changes with speech recognition editing training that will help you:

- **Expand your resume.** Add experience editing speech recognition generated reports to your resume and stay up-to-date in the industry.
- **Get access to more jobs.** Employers are looking for professionals with advanced medical transcription skills that include editing, and you can quickly gain the edge you need to be more in-demand.
- **Prepare for the future of the industry.** Stay competitive and advance your career by adding speech recognition editing to your resume.

Career Step's Career FastTrack: Medical Transcription Editing course is specifically designed to help you quickly learn how to work with speech recognition generated reports and gain valuable experience you can add to your resume.

IS THIS COURSE RIGHT FOR ME?

Career Step course is designed for experienced medical transcriptionists or those who have completed a medical transcription training

program. The course builds on your medical transcription skills, teaching editing theory and providing the opportunity to work with speech recognition generated reports.

If you're unsure whether the Career FastTrack: Medical Transcription Editing course is right for you, take Career Step's quick skills evaluation test today at: CareerStep.com/mtesupp-skill_evaluation
